

GREEN HILL / LOMBOK

FULL WEBSITE BUILD BRIEF

For Firman - September 2026

Core objective

Build a premium, personal and investment-led South Lombok property platform that feels closer to a boutique investment house and architectural studio than a conventional estate agency.

The website must establish trust in Reece personally, showcase a small number of curated opportunities, capture qualified investor leads, and provide a separate pathway for large private investment opportunities.

1. The overall idea

Green Hill should not look or feel like a traditional Indonesian estate agency website. Avoid hundreds of listings, aggressive sales language, flashing prices, 'hot deal' treatment or a mass-market property portal feel.

The brand is a small, trusted, boutique property and investment business focused on South Lombok. The website should combine three things: **Person - Place - Opportunity**.

The person is Reece / founder of Green Hill. The place is South Lombok. The opportunities are carefully selected land, villas and larger investment/development opportunities.

Desired feeling: personal, local, premium, knowledgeable, honest and curated. Not corporate and not pretending Green Hill is a huge organisation.

2. The Green Hill story

Green Hill should explain why the business exists. Reece moved from the UK to Lombok with his partner and daughter and initially came as someone looking to invest personally.

He bought land in Are Guling and personally went through the process many foreign investors are trying to understand: finding land, ownership/company structures, notaries, due diligence, zoning, local relationships, architects/builders and construction.

Over time, relationships with landowners, developers and professionals began creating access to opportunities that are not always widely marketed.

Core philosophy: Green Hill is not trying to list every property available in Lombok. If Reece would not seriously consider an opportunity himself, it does not need to be on Green Hill.

The ideal conversation is: *'I've got £150,000 to invest in Lombok. Where would you put it?'* Green Hill then understands the investor and curates the right opportunities.

3. Reece must be visible

Do not hide the founder on an About page. Visitors should understand very quickly that there is a real person living and investing in Lombok behind the business.

Use natural on-site photography rather than a corporate headshot. Show Reece visiting land, developments and projects.

Suggested homepage copy:

FROM INVESTOR TO GREEN HILL

I originally came to Lombok looking for opportunities for myself. After buying land here and going through the process personally, I began building relationships with local landowners, developers and professionals across South Lombok. Those relationships started opening doors to opportunities that aren't always publicly marketed. Green Hill grew naturally from there.

Today, I personally visit and select the opportunities we represent - from individual building plots and villas to larger land and development opportunities.

I'm not interested in having the most listings. I'm interested in finding the right ones.

- Reece Green, Founder

Primary CTAs: **My Story** and **Talk to Reece**. Avoid generic 'Contact Agent' language.

4. Homepage structure

Hero: large South Lombok photography/video; GREEN HILL / LOMBOK; 'Curated property & investment opportunities in South Lombok.' Secondary line: 'Local knowledge. Carefully selected opportunities. A personal approach to investing in Lombok.'

Founder introduction: photograph + concise founder story.

Selected opportunities: only 3-6 featured opportunities with large imagery and minimal clutter.

Green Hill Private teaser: introduce the existence of larger, privately presented development/investment opportunities.

Trust/education: simple pathway into buying-in-Lombok educational content.

Final CTA: investor enquiry or direct WhatsApp conversation with Reece.

5. Standard opportunities

Maintain approximately 6-15 carefully selected opportunities rather than a huge catalogue.

Suggested categories: **Land, Villas, Off-plan, Private Investments**. Optional location filters: Are Guling, Tampah, Selong Belanak, Mawun, Pengantap and other South Lombok.

Listing cards should be highly visual and clean. Show only useful headline information: location, opportunity type, land size, tenure where appropriate, price or Price on Request, and a View Opportunity CTA.

6. Individual opportunity page

Each page should feel closer to a small investment memo than an estate-agent listing.

Include: hero imagery/video; overview; a bespoke **Why Green Hill Likes It** section; location; price; size; tenure/title; verified zoning; road access; verified utilities; relevant distances; development status; gallery; drone footage; map where appropriate; masterplan; downloadable brochure/PDF.

Finish with **Interested in this opportunity? Talk directly to Reece** and WhatsApp/enquiry options.

7. Trust and education

Create a **Buying Property in Lombok** section in plain English covering foreign ownership considerations, freehold vs leasehold, PT PMA/company structures where applicable, due diligence, notaries, zoning, road access, transaction costs/taxes, building permits and buying off-plan.

This content is educational, not legal advice. Encourage appropriate independent legal, notarial and tax advice.

Create a **Why Lombok?** page based on why Reece personally chose Lombok: South Lombok development, Mandalika, airport accessibility, beaches/surf/lifestyle, infrastructure, development quality, relative land pricing and the long-term tourism thesis. Avoid guaranteed-return claims.

8. Notes from Lombok / journal

Create a future-ready editorial section such as **Notes from Lombok**. This is a major trust and SEO asset and can integrate with Instagram.

Potential articles: Why I bought land in Are Guling; what I've learnt buying land in Lombok; what IDR 1bn buys; Are Guling vs Selong Belanak; what I look for when viewing land; great view vs great investment; development of my own villa; interesting projects I visit.

The aim is to make the site feel like Reece's window into the Lombok property market, not a catalogue.

9. Investor enquiry and CRM

Lead capture is one of the most important functions. Ask for name, email, WhatsApp, country, budget, opportunity type, main objective, timeframe and message.

Suggested budget bands: under £50k; £50-100k; £100-250k; £250-500k; £500k-£1m; £1m+.

Interests: land, villa, off-plan, rental investment, land banking, development opportunity, lifestyle/home, not sure yet.

Objectives: capital growth, rental income, development, lifestyle, combination.

Store enquiries in the admin system, not only by email. Basic statuses: **New - Contacted - Qualified - Viewing - Negotiating - Completed**. Allow notes against each investor.

10. Admin requirements

Admin must allow Reece to add/edit/archive listings; set Available/Reserved/Sold; mark Featured; choose Public/Private; use Price or Price on Request; enter IDR/USD/GBP display where appropriate; location; land size; tenure; zoning; description; Why Green Hill Likes It; gallery; video; map; PDF/brochure; masterplan; SEO title/description; social-sharing image.

Support GA4 and Meta Pixel. Domain, hosting, database and third-party accounts should ideally be controlled by Green Hill. Green Hill should own source code, database and site content/design after payment and another developer must be able to take over later. Confirm backup/security approach and indicative recurring costs.

11. Currency and WhatsApp

IDR should normally be the primary/local price. USD should be available for international investors. GBP can be used selectively where useful. Clearly label currency conversions as approximate.

WhatsApp should be prominent but tasteful. Use **Talk to Reece**, not 'Chat with Agent'. Prepopulate messages with the opportunity name so the source of each lead is clear.

12. Design direction

The site should feel closer to a **boutique hotel, architectural studio or private investment house** than an estate agent.

Palette: deep forest/olive green, warm ivory, sand/stone, charcoal and very restrained burnished gold/bronze accents. Use beautiful typography, large real photography, generous breathing room, subtle animation and excellent mobile design.

Avoid bright estate-agent colours, huge listing grids, red sale banners, countdowns, excessive icons, stock photography, corporate handshake imagery and generic Bali/palm-tree clichés.

Use real photography: site visits, drone imagery, landowners/developers where appropriate, roads, beaches, construction, architecture and actual opportunities. The visitor should think: *'This guy is actually there.'*

13. Tone of voice

Simple, conversational English. Confident without hype. Enthusiastic but credible.

Prefer: *'This is one of the best views we've seen in Are Guling.'* Avoid: *'Unmissable once-in-a-lifetime investment opportunity.'*

Prefer: *'We think this is particularly interesting as a long-term land bank.'* Avoid guaranteed ROI or guaranteed appreciation.

14. What Green Hill is really selling

ACCESS - relationships with landowners and developers.

CURATION - selecting opportunities worth considering rather than listing everything.

LOCAL KNOWLEDGE - physically being in Lombok and visiting opportunities.

PERSONAL EXPERIENCE - Reece has invested his own money and gone through the process.

TRUST - investors deal with a real person from the first conversation onward.

OPPORTUNITY - from smaller building plots and villas through to multi-million-dollar development land.

15. Core customer journey

Instagram / Google / referral → Green Hill website → learns about Reece and Green Hill → understands Lombok → browses selected opportunities → submits investor profile or WhatsApps Reece → conversation with Reece → Green Hill understands budget/objective/timeframe → sends 2-4 relevant opportunities → site visit/video call/DD → transaction.

The site succeeds if a first-time visitor understands within roughly 30 seconds: Reece is a British investor living in Lombok; he has invested here himself; he has built a local network; Green Hill accesses interesting opportunities; Green Hill does not list everything; and the visitor can speak directly to him.

PART II - GREEN HILL PRIVATE

Large-scale land, development & private investment opportunities

This is a separate website journey for sophisticated private investors, developers, family offices, investment groups and hospitality operators. It should feel like a boutique investment platform, not another listing category.

16. Green Hill Private - purpose

Green Hill is receiving access to much larger opportunities: 1-2 hectare strategic land banks, 5-15+ hectare development sites, large beachfront holdings, resort/hospitality opportunities, masterplanned developments, off-market land and potential JV/development opportunities.

Transaction values may range from hundreds of thousands to several million USD. These should not look like normal property listings.

Create a dedicated section: **GREEN HILL PRIVATE - Private land & development opportunities in South Lombok.**

The public page should communicate enough scale and investment logic to create serious interest, while protecting sensitive information and encouraging a qualified enquiry.

17. Public investment teaser page

Each large opportunity gets a premium public-facing page with a strong hero drone image/video and a concise investment description.

Example: **SOUTH LOMBOK - BEACHFRONT DEVELOPMENT OPPORTUNITY**

9.2 Hectares | Prime Beachfront | South Lombok.

Headline data can include site area, broad location, opportunity type, position and selected tenure information. Investment value can be POA, 'from USD X', a range, or fully disclosed depending on the deal.

Use language such as: *'Full investment information is available privately through Green Hill.'*

18. Disclosure controls

For every private opportunity, admin must support show/hide controls for: price, exact location, map, masterplan, seller/developer name, tenure/title information and downloadable documents.

For some opportunities the public page may show only 'South Lombok' rather than the exact location, and 'Price on Application' rather than the full acquisition value.

The objective is qualified lead generation and deal protection, not publishing the complete deal.

19. Show project scale visually

International investors who have never visited Lombok need to understand scale instantly.

Show hectares and square metres prominently, plus useful scale comparisons where appropriate. Use drone photography, boundary overlays, masterplans, maps, topography, site dimensions, verified beachfront length, surrounding development and distances to Kuta/airport/beaches.

A 9.2-hectare site should visually feel like a major development opportunity rather than a larger version of a normal land listing.

20. Investment thesis

Every private opportunity needs a bespoke **Why Green Hill Is Looking At This / Investment Thesis** section.

Discuss factors such as scarcity, location, surrounding development, entry price, scale, potential use and long-term thesis. Clearly distinguish known facts from concepts and future possibilities.

Do not use fake ROI, guaranteed appreciation or unsupported hype.

21. Private-investor CTA and qualification

Primary CTA: **REQUEST INVESTMENT MEMORANDUM.**

Qualification form: name, company, country, email, WhatsApp; capital available; investor type; areas of interest; timeframe; message.

Suggested capital bands: USD 100k-250k; 250k-500k; 500k-1m; 1m-5m; 5m-10m; 10m+.

Investor types: Private Investor, Developer, Family Office, Investment Group, Hospitality Operator, Other.

Interests: Land Banking, Development, Hospitality, Residential Development, JV Opportunities, Other.

These enquiries must flow into the Green Hill CRM for qualification before sensitive information is released.

22. 5-10 page Investment Memorandum

After qualification, Reece needs to be able to send a polished Green Hill PDF to an investor who may never have visited Lombok. The PDF should use the same visual identity as the website.

Page 1 - Cover: Green Hill Private; opportunity name; strategic opportunity subtitle; size/location; strong aerial image; Private & Confidential.

Page 2 - Executive Summary: location, size, price, price/are or m², tenure/title, zoning, access, beachfront where relevant, current status and concise overview.

Page 3 - Why Lombok / Why This Location: Indonesia → Lombok → South Lombok → site. Show airport, Kuta/Mandalika, beaches, major developments and drive times.

Page 4 - The Site: aerial boundary, area, dimensions, topography, access, frontage and site photographs.

Page 5 - Investment Thesis: why Green Hill is presenting it; scarcity, location, development context, entry price, scale and long-term logic.

Page 6 - Development Potential: illustrative concepts such as villas, boutique resort, wellness, residential or mixed hospitality. Clearly state concepts are subject to zoning, planning, feasibility and professional advice.

Page 7 - Commercial: private pricing, acquisition value, assumptions, known transaction costs, possible scenarios and comparables where supported. Any projected returns must show assumptions and never be guaranteed.

Page 8 - Legal / Due Diligence: known title, certificates, zoning, access, surveys, ownership and documents available.

Page 9 - Next Steps: call with Green Hill → confidential information → site visit/video → independent DD → negotiation → transaction; direct contact with Reece.

Some opportunities may use 5-7 pages; more complex deals may use 8-10. Quality and clarity matter more than page count.

23. Data architecture for website + memorandum

Do not build a complicated automatic PDF generator in V1. However, structure the opportunity database so the same core data can later support both the website and Investment Memorandum.

Suggested fields: opportunity title; reference (e.g. GH-001); public/private; location; coordinates; area; price; price/are; tenure; zoning; access; utilities; description; Green Hill view; investment thesis; development potential; risks; photos; drone video; boundary image; masterplan; maps; documents.

Output A: **Public website** - only fields Reece marks public. Output B: **Private Investment Memorandum** - a bespoke PDF uploaded to the opportunity and sent after qualification.

24. Phase 2 - digital deal room

Build the architecture so a future private link such as greenhilllombok.com/private/GH-003 can be added without rebuilding the site.

Future deal room could be password/token protected and contain the full memorandum, drone video, exact map, boundaries, pricing, masterplan, PDF and selected supporting DD documents.

This does not need to be in the initial launch.

25. Two distinct website journeys

Normal buyer: Opportunities → land/villa → Talk to Reece. Typically smaller property/investment purchases.

Investor/developer: Green Hill Private → large opportunity → investment thesis → Request Memorandum → qualification → Reece → private investment pack.

Both must feel like the same Green Hill brand, but Green Hill Private should feel more like a boutique investment house.

26. What a large investor should understand

Imagine a person in Dubai with USD 5m who has never visited Lombok. Within five minutes they should understand where Lombok is, why South Lombok is interesting, who Reece is, why Green Hill has access to the opportunity, the scale of the site, the investment thesis, what is known, what still needs verification, approximate capital required, potential strategy and how to speak to Reece.

The desired reaction is: *'I need to speak to Reece about this.'*

27. Launch priorities

Phase 1 / launch: homepage; founder story; curated standard opportunities; individual opportunity pages; Green Hill Private teaser/pages; investor qualification; CRM; WhatsApp; PDF upload/download; GA4/Meta Pixel; responsive design; core SEO.

Phase 2: Notes from Lombok journal expansion; sophisticated investor deal room; richer CRM; optional automated memorandum generation; deeper analytics/marketing automation.

Do not delay launch by overbuilding. The most important result is a premium, trustworthy site that generates direct conversations with Reece.

FINAL DESIGN PRINCIPLE

Green Hill's competitive advantage is not having the most property listings.

It is the combination of **Reece's personal presence, local access, curation, credibility and direct investor relationship** - with a second, more discreet layer for serious private investment opportunities.

If the finished site makes an investor feel that they know who Reece is, understand why he is in Lombok, trust that he is physically close to the opportunities, and feel comfortable starting a direct conversation, the website has done its job.

GREEN HILL / LOMBOK

Curated opportunities | Local knowledge | A personal approach
