Every screenshot in this guide is taken from the Green Hill Admin itself. Example records are marked DEMO; no real visitor information is shown. Numbered markers on a screenshot match the numbered notes beneath it.

Welcome

The Green Hill Admin is where you look after the website yourself: no code, no developer in between. Everything a visitor sees on the website is edited here, and everything visitors send you arrives here.

With it you can:

- **Edit every page of the website:** the homepage, About / Reece, Why Lombok, Buying in Lombok, Green Hill Private, the Opportunities and Notes pages, the enquiry page, and the footer.
- **Present opportunities:** add land and investment opportunities, set their price and status, feature them on the homepage, keep them private, or present them as a Green Hill Private teaser.
- **Publish Notes:** short field notes and articles for the journal.
- **Follow every enquiry:** see who reached out, what they are looking for, and where each conversation stands.
- **Look after search and sharing:** how pages appear on Google and when a link is shared on WhatsApp or social media.
- **Manage who can sign in:** add or remove admins.

Nothing you change reaches the website until you publish it. Drafts, previews and notes are only ever visible to you.

A few words you will see throughout:

- **Draft:** saved, but not on the website yet.
- **Publish:** put it on the website now.
- **Preview:** see the real page with your changes before anyone else does.
- **Original copy:** the approved wording the website launched with. You can always return to it.

01 Signing in

The admin lives at the website address followed by **/en/admin**. Until the Green Hill domain is connected that is `green-hill-lombok.vercel.app/en/admin` ; afterwards it is the same path on the new address. Bookmark it.

- 1 Open the admin address in your browser.
- 2 Enter your email address.
- 3 Enter your password. The eye button shows what you typed, if you want to check it.
- 4 Click **Sign in**.

FIGURE 1 The sign-in page.

- 1 Your email address.
- 2 Your password. The eye shows or hides it.
- 3 Sign in.
- 4 Forgot password? Sends you a link to choose a new one.

Forgot your password? Click **Forgot password?**, enter your email address and click **Send reset link**. An email arrives with a link; open it and choose a new password (at least 12 characters, with a capital letter, a small letter and a number). The link works once. If it has expired, simply ask for a new one.

FIGURE 2 Asking for a new password.

- 1 The email address you sign in with.
- 2 Send reset link.

You stay signed in on your own computer and phone until you sign out. To sign out, click your name at the bottom of the sidebar and choose **Sign out**. Nobody can open any admin page without signing in, and there is no public sign-up: only people you add as admins can get in.

FIGURE 3 Signing in on a phone works the same way.

02 Finding your way around

After signing in you arrive on the **Overview**: a calm summary of where Green Hill stands today.

FIGURE 4 The Overview.

- 1 The sidebar: every part of the admin.
- 2 The numbers that matter: live opportunities, drafts, private opportunities and new enquiries. Click one to open that list.
- 3 What needs your attention: new enquiries waiting for a reply, photographs without a description, pages without a search description.
- 4 The latest enquiries.
- 5 Add opportunity: the quickest way to start a new listing.
- 6 Website: opens the public website in a new tab.
- 7 Your account: your name, Account settings, Change password and Sign out.

The numbers are real counts from your own records. Nothing is estimated or invented, so a quiet week looks quiet.

The sidebar

The sidebar has four groups. Click a group to open it; the admin remembers which groups you like open.

FIGURE 5 The sidebar with Content and Opportunities open.

- 1** Content: every page of the website, plus Notes (articles).
- 2** Opportunities: all listings, and quick views of Drafts, Available, Reserved, Sold, Private and Archived. The small numbers are counts.
- 3** Relationships: Enquiries and Users & Admins.
- 4** Settings: Site settings (contact details), SEO & social, and Account.
- 5** Collapse the sidebar to a slim rail when you want more room.

On a phone or tablet

The admin works on a phone. The sidebar folds away behind the menu button at the top left; tap it to open, tap a page to go there, and it closes by itself. On editing pages, the **Preview**, **Save draft** and **Publish** buttons sit at the bottom of the screen, within reach of your thumb.

FIGURE 6 The Overview on a phone.

1 Menu: opens the sidebar.

FIGURE 7 The sidebar opened on a phone.

03 Editing website content

Every page of the website is under **Content**. Click **Content** in the sidebar to see them all, then choose a page.

FIGURE 8 Content: every page of the website, with its current state (Original copy, Draft or Edited).

Every page editor works the same way, so once you have edited one you can edit them all.

FIGURE 9 A page editor (here, the Homepage).

- 1 The sections of the page, in the order visitors see them. Click one to jump to it. A green dot means complete; gold means something needs attention.
- 2 Language: English is the main version. Indonesian, Dutch and Spanish keep their approved translation until you change them.
- 3 Each section has its own card with its photographs and words. The arrow folds it away.
- 4 Live preview: the real page on a phone, showing your saved draft. It refreshes each time your changes are saved.
- 5 Preview: opens the page larger, on desktop, tablet or phone.
- 6 Save draft: saves straight away (the admin also saves by itself a moment after you stop typing).
- 7 Publish: puts your changes on the website.

Editing a field

- 1 Open the page and find the section (use the section list at the top).
- 2 Click into a field and type. Each field has a plain label and, where useful, a short hint underneath.
- 3 Stop typing. After a moment the status under the page title changes to **Draft saved**. Your change is safe, but not public yet.
- 4 Check the live preview on the right, or click **Preview**.
- 5 When you are happy, click **Publish**.

FIGURE 10 Editing a field.

- | | |
|---|--|
| <p>1 The field you changed.</p> <p>3 The save status: Draft saved, and Draft - not yet published beneath the title.</p> | <p>2 Restore original: puts back the approved wording for this one field.</p> <p>4 Discard changes: throws away the whole draft and returns to what is on the website now.</p> |
|---|--|

A vertical bar | in a headline starts a new line, exactly where the design breaks it. Leave the bars in place unless you want the line breaks to move.

Photographs. Click **Upload a new image** under a photograph to replace it. Always fill in the **Image description**: one plain sentence saying what the photograph shows. It is read aloud to people who cannot see the image and helps search engines. Photographs marked *Original image* are the ones the site launched with.

Other languages. Switch the language tabs above the sections to edit the Indonesian, Dutch or Spanish version. When you change the English wording, the other languages show **Needs translation** on that field until you update them; until then visitors in those languages keep seeing the older, approved translation.

The pages you can edit

- **Homepage:** covered in detail in the next chapter.
- **About / Reece:** your story, the place (Are Guling), relationships with landowners, developers and notaries, how Green Hill works, what Green Hill selects, on the ground, and the closing invitation.
- **Why Lombok:** the place, South Lombok and its development, access and the airport, beaches and lifestyle, the longer view, and the closing disclaimer.
- **Buying in Lombok:** the introduction, the educational disclaimer and up to eleven plain-English topics (freehold and leasehold, company structures, notaries, road access, costs and taxes, permits, buying off-plan).
- **Green Hill Private:** who it is for, why private, private opportunities, the relationship-led process and the enquiry.

- **Opportunities page:** the collection page, and the shared wording that appears on every opportunity page (headings, the contact panel, the WhatsApp message).
- **Notes page:** the journal page around the notes themselves.
- **Enquiry page:** the investor enquiry page and the version shown when someone asks about a Green Hill Private opportunity.
- **Footer & contact:** the footer at the bottom of every page.

Each page also has a **Search & sharing** section: see chapter 08.

04 Managing the homepage

Open **Content > Homepage**. The page is made of seven sections, in the order visitors scroll through them.

- **01 Hero:** the first thing every visitor sees. Three photographs that change slowly, the small label above the headline, the headline itself (and a shorter version for phones), the supporting line, the two buttons, and the short note from you beside the hero.
- **02 Reece's introduction:** your photograph, a short story in up to four paragraphs, a quote, your name and role. Keep it personal and brief; the full story lives on About / Reece.
- **03 Selected opportunities:** the heading and introduction above the opportunities chosen for the homepage, the link to all opportunities, the text shown while nothing is published, and **how many opportunities to show**. The opportunities themselves are chosen with *Featured* (chapter 05).
- **04 Green Hill Private teaser:** a short invitation to the private route, with its photograph and button.
- **05 Why Lombok & buying:** the bridge to the Why Lombok and Buying in Lombok pages.
- **06 Closing invitation:** the last word before the footer, with its main photograph and buttons.
- **07 Search & sharing:** how the homepage appears on Google and when shared (chapter 08).

To edit the homepage: open the section, change the words or photograph, watch the live preview, then **Preview** and **Publish** as in chapter 03 and chapter 10.

The footer at the very bottom of the homepage is shared by every page, so it has its own editor: **Content > Footer & contact**.

FIGURE 11 Footer & contact: the footer photograph, the short brand description, the location and the three promises. Email, WhatsApp and Instagram come from Site settings (chapter 09).

05 Managing opportunities

Opportunities are the heart of the website. Each one is built in seven short steps, and you can move between steps freely: nothing is lost when you go back and forth, and a new opportunity is saved as a private draft from the very first click on **Save draft**.

The opportunities list

FIGURE 12 Opportunities > All.

- 1 Search by title, reference or area.
- 2 Filter by status, public or private, type and area.
- 3 Featured only: shows just the opportunities featured on the homepage.
- 4 An opportunity: its photograph, title, area and reference. Click it to open it.
- 5 Edit.
- 6 The ... menu: quick actions without opening the opportunity.

FIGURE 13 Quick actions from the ... menu.

- 1 Change the status (Mark as reserved, Mark as sold, Mark as available).
- 2 Feature on the homepage, or Remove from featured.
- 3 Move to private.
- 4 Archive opportunity.

The menu also offers **Preview**, **Duplicate** (a copy to start a similar listing, saved as a draft) and **Unpublish** (take it off the website and back to draft).

Creating an opportunity

Click **Add opportunity**. The steps are listed on the left; a gold ring means the step still needs something before publishing, a green tick means it is complete, and *Optional* steps can be left for later.

Step 1 · Basics

The name, the kind of opportunity, who can see it, and the price.

FIGURE 14 Step 1, Basics.

- 1 Title: short and descriptive, for example "Elevated Coastal Land, Selong Belanak".
- 2 Reference: filled in for you (GH-LOM-007 and so on). Change it only if you keep your own numbering.
- 3 Type: land, villa and so on.
- 4 Summary: one or two plain sentences on what it is and where. At least 20 characters.
- 5 The steps. You can click any of them.
- 6 Save draft.

FIGURE 15 Step 1, continued: where it appears, and the price.

- 1 Public (shown on the website once published) or Private (handled directly through Green Hill).
- 2 Featured: may appear in the homepage selection.
- 3 Price on request: switch on to show "Price on request" instead of a figure.
- 4 The price and its currency. IDR is the usual source currency; the admin shows approximate USD and GBP conversions to help you, but stores exactly what you typed.
- 5 How the price reads: an exact price, "From" a price, or a range (you then add the top of the range).

- 1 Enter the title.
- 2 Check the reference.
- 3 Choose the type.
- 4 Write the summary.
- 5 Choose Public or Private.
- 6 Enter the price, or switch on *Price on request*.
- 7 Click **Save draft**, then **Next: Location**.

Step 2 · Location

Green Hill Admin - Opportunities

Website

← Opportunities

DEMO · Selong Belanak Hillside Land

GH-LOM-007 DRAFT PUBLIC Unsavd changes - saving shortly

STEP 02

Location

Enough for a visitor to understand where it is. The area alone is fine; exact coordinates are optional.

1 Region

South Lombok

2 Area

Selong Belanak

3 Location shown on the website OPTIONAL

Leave empty to show "Selong Belanak, South Lombok". Only add a street address if you are happy for it to be public.

Map position

Optional. A Google Maps link, or coordinates, places a map under the location name. Leave both empty and the page shows only the place name.

4 Google Maps link OPTIONAL

https://maps.app.goo.gl/...

Paste a maps.google.com or maps.app.goo.gl link. It is shown on the opportunity and opens in Google Maps.

Latitude OPTIONAL

Longitude OPTIONAL

South Lombok is around -8.9.

South Lombok is around 116.2.

FIGURE 16 Step 2, Location.

- 1 Region, for example South Lombok.
- 2 Area: the village, bay or district, for example Selong Belanak.
- 3 Location shown on the website: leave empty to show "Area, Region". Add a street address only if you are happy for it to be public.
- 4 Google Maps link (optional): places a map under the location name. Coordinates can be used instead.

Further down are **Road access**, **Utilities** and **Nearby places**. Only write what has been verified; each appears on the opportunity page when filled in.

Step 3 · Land & specifications (optional)

Green Hill Admin - Opportunities

Website

← Opportunities

DEMO · Selong Belanak Hillside Land

GH-LOM-007 DRAFT PUBLIC Unsavd changes - saving shortly

STEP 03

Land & specifications

Only what you know to be true. Anything left empty stays "Not specified" and is simply not shown.

Land

1 Land size OPTIONAL

2450 m²

In square metres. 10,000 m² = 1 hectare.

Building area OPTIONAL

Not specified m²

Leave empty for bare land.

Tenure & planning

Record what the documents say. The website shows these values as written, without interpretation.

2 Tenure OPTIONAL

Freehold

3 Zoning OPTIONAL

Tourism

4 Development status OPTIONAL

Undeveloped land

Developer or landowner

Developer / landowner name OPTIONAL

FIGURE 17 Step 3, Land & specifications.

- 1 Land size in square metres (10,000 m² is one hectare).
- 2 Tenure: Freehold, Leasehold, HGB, Hak Pakai or Other, with the term remaining when relevant.
- 3 Zoning.
- 4 Development status.

Record what the documents say. The website shows these values as written, without interpretation, and anything left empty simply reads "Not specified". For villas and buildings there are also building area, bedrooms, bathrooms, storeys, year built and furnishing. The developer or landowner name is at the bottom of this step.

Step 4 · Media

Between one and eight photographs; four to six usually tells the story well.

FIGURE 18 Step 4, Media: adding photographs.

- 1 Drag photographs here, or click Choose photographs. JPEG, PNG or WebP, up to 5 MB each. They are resized and optimised for you.

FIGURE 19 Arranging photographs.

- 1 The first photograph is the Primary one: the large image on the opportunity page and the image on cards.
- 2 Description: one plain sentence on what the photograph shows (for screen readers and search engines).
- 3 Make primary: moves this photograph to the front.
- 4 Replace: swap the photograph and keep its place.
- 5 Remove.
- 6 Drag this handle to change the order (or focus it and use Space and the arrow keys).

Under the photographs, **Film & documents** takes an optional **video** link (YouTube or Vimeo; drone footage works the same way), a **brochure**, a **masterplan** and the **investment memorandum**. Documents are stored privately. A brochure or masterplan is only offered for download on the website if you switch that on; the investment memorandum is never shown on the website.

— Step 5 · Story (optional)

FIGURE 20 Step 5, Story.

- 1 Main description: the land, the setting, access and what is around it. Headings and short paragraphs read best. The small toolbar adds headings, bold, italics and lists.
- 2 Why Green Hill likes it: in your own words, what caught your eye.
- 3 Development potential: possible uses, for example boutique villas or a small resort, shown with a note that concepts depend on zoning, planning and professional advice.

FIGURE 21 The last field of the Story step.

- 1 Known facts and what still needs verification: your private working notes. They are never shown on the website, in previews or on teasers.

— Step 6 · Search & sharing (optional)

How the opportunity appears on Google and when its link is shared. Everything here has a sensible default, so you can skip it. See chapter 08 for what each field means.

FIGURE 22 Step 6, Search & sharing.

- 1 A preview of the Google result.
- 2 The public page address. It follows the title until the opportunity is first published, then stays fixed so shared links keep working.
- 3 Title on Google: leave empty to use the opportunity title.
- 4 Description on Google: leave empty to use the summary.

FIGURE 23 Choosing the sharing image.

- 1 The photograph shown when the link is shared on WhatsApp, email or social media. The primary photograph is used unless you choose another.
- 2 Original page address (canonical link): only needed if this opportunity was first published on another website.

Step 7 · Review & publish

FIGURE 24 Step 7, Review.

- 1 Ready to publish: the few things every opportunity needs (title, type, summary, price, location, a primary photograph). Anything missing has an Add button that takes you straight there.
- 2 What becomes public: exactly what visitors will see, including the public page address.
- 3 Preview the memo: the real opportunity page, before anyone else sees it.

FIGURE 25 Previewing the opportunity page.

- 1 Desktop.
- 2 Tablet.
- 3 Mobile.

FIGURE 26 Publishing.

- 1 Choose the status it goes live with: Available, Reserved or Sold.
- 2 Publish opportunity. It appears on the website straight away.

After publishing, the status beneath the title changes (for example *Available*), and further edits are kept aside until you click **Save changes**, so the live page never shows half-finished work.

FIGURE 27 A published opportunity.

- 1 The status: live changes are saved only when you click Save changes.
- 2 Preview: always shows the version you are working on.

Opportunity statuses

- **Draft:** being prepared. Never on the website.
- **Available:** live on the website and open to enquiries.
- **Reserved:** still shown, marked Reserved, while a sale is being agreed.
- **Sold:** still shown, marked Sold. Useful as a record of what Green Hill has placed.
- **Archived:** taken off the website and out of your everyday lists. Nothing is deleted; **Restore as draft** brings it back.

Separately from the status, each opportunity is either **Public** or **Private**:

- **Private** opportunities are handled directly through Green Hill and are never listed on the website. They appear in your **Opportunities > Private** workspace.
- A private opportunity can be presented as a **Green Hill Private teaser** (below).

Choose the status that is true today, and change it as soon as it changes: visitors trust what they read.

Featured opportunities

Featured opportunities are the ones that may appear in the homepage's *Selected opportunities* section. The number shown on the homepage is set in **Content > Homepage > 03 Selected opportunities**.

- **To feature:** open the ... menu on the opportunity and choose **Feature on the homepage**, or switch on **Featured** in Step 1.
- **To stop featuring:** choose **Remove from featured**, or switch it off in Step 1.

- Use **Featured only** on the opportunities list to see which are featured.
- Private opportunities cannot be featured.

Green Hill Private teasers

A private opportunity can have a discreet public page on Green Hill Private, for serious enquiries, showing only what you choose.

FIGURE 28 Presenting a private opportunity as a teaser (Step 1).

- 1 Choose Private.
- 2 Switch on Present as a teaser on Green Hill Private.
- 3 Choose what the teaser may show: price, exact location, map, tenure, developer or landowner. Anything switched off is never sent to the website.

The teaser always shows the title, summary, description, why Green Hill is looking at it, zoning, utilities, development status and the photographs. The investment memorandum and your private notes are never shown. Visitors can ask for the memorandum through the enquiry form, and you decide who receives it.

FIGURE 29 Opportunities > Private: your private opportunities and the enquiries about them, in one place.

Archiving and restoring

Choose **Archive opportunity** from the $\dots$ menu. The admin asks you to confirm; the opportunity leaves the website and moves to **Archived**. To bring it back, open **Archived**, choose **Restore as draft** from the $\dots$ menu, check it, and publish again.

FIGURE 30 Archiving always asks first, and can always be undone.

01 Basics 02 Location 03 Land & specification

STEP 01

Basics

What this opportunity is called, what kind it is, and who can see it.

Identity

Title REQUIRED

DEMO · Selong Belanak Hillside Land

Short and descriptive, e.g. "Elevated Coastal Land, Selong Belanak".

Reference

GH-LOM-007

Generated for you. Change it only if you keep your own numbering.

Type REQUIRED

Back Next: Location

FIGURE 31 Editing an opportunity on a phone. Back and Next stay at the bottom of the screen.

06 Managing Notes

Notes are Green Hill's journal: field notes and short articles, published on the Notes page of the website. Open **Content > Notes (articles)**.

FIGURE 32 Notes.

1 New note.

2 Views: All, Drafts, Published and Archived.

Writing a note

FIGURE 33 The note editor.

- 1 Title.
- 2 Summary: shown in the Notes list and under the title.
- 3 Language: write in English first; other languages can be added later.
- 4 Preview: the real article page.
- 5 Publish.

FIGURE 34 The body of the note is written in parts.

- 1 Each part can have a heading.
- 2 The text. Leave an empty line between paragraphs.
- 3 Add a part: another heading and text, with an optional pull quote and photograph.

FIGURE 35 About this note: the cover and search.

- 1 Cover photograph (required) with its description, plus the topic, date, author and the Lead note switch (shown first and larger on the Notes page).
- 2 Search description: how the note appears on Google. The summary is used when this is empty.

- 1 Click **New note**.
- 2 Write the title, summary and the parts of the article.

- 3 Upload a cover photograph and describe it.
- 4 Check **Preview**.
- 5 Click **Publish**.

Publish stays unavailable until the note has everything it needs (a title, a summary, some text and a cover photograph). Once published, changes are kept aside until you click **Save changes**. **Unpublish** takes a note off the website and back to draft; a draft can then be **Archived** (and **Restored** later) or **Deleted**.

07 Managing enquiries

Every enquiry sent from the website arrives in **Relationships > Enquiries**, and new ones are counted on the Overview. You can also add one yourself with **Record enquiry**, for example after a phone call.

FIGURE 36 Enquiries.

- 1 Views by stage: Open, New, Contacted, Qualified, Viewing, Negotiating, Completed, Closed and All.
- 2 Search by name, contact, country or message, and filter by source.
- 3 An enquiry. Click it to open it.

FIGURE 37 An enquiry (DEMO data).

- 1 WhatsApp: opens a conversation with this person straight away.
- 2 Email.
- 3 Their investor profile: budget, main objective and timeframe, then their message.

Where each conversation stands

Move the enquiry along as the conversation develops:

- **New:** just arrived, not yet answered.
- **Contacted:** you have replied or reached out.
- **Qualified:** a genuine fit worth pursuing.
- **Viewing:** a site visit is arranged or has happened.
- **Negotiating:** terms are being discussed.
- **Completed:** the purchase went through.
- **Closed:** the conversation ended without a purchase.

FIGURE 38 Status and private notes.

- 1 Click the stage the conversation has reached.
- 2 Add a private note: what was discussed, what comes next.
- 3 Add note. Notes and every change of stage are kept in the history below, with the date.

Notes are only visible in the admin. Enquiries are never shown on the website.

FIGURE 39 An enquiry on a phone: WhatsApp and Email are one tap away.

08 SEO & social sharing

Every page, opportunity and note has a **Search & sharing** section. Everything in it is optional: when a field is empty, the admin uses a sensible default (the title, the summary, the primary photograph).

- **SEO title** (*Title on Google*): the blue headline in a Google result. Around 60 characters show in full.
- **Meta description** (*Description on Google*): the two lines of text under it. Around 155 characters show in full. Write it for a person deciding whether to click.
- **Public page address**: the end of the web address, for example `/property/selong-belanak-hillside-land`. It is fixed once the page is published, so links people have shared keep working.
- **Canonical link** (*Original page address*): only for something first published on another website. Usually leave it empty.
- **Social image** (*Sharing image*): the picture shown when the link is shared on WhatsApp, email or social media.

The website-wide defaults are in **Settings > SEO & social**.

FIGURE 40 Settings > SEO & social.

- 1 Site title: the website's name, used where a page has no title of its own.
- 2 Site description: used where a page has no description of its own.
- 3 Each page: a list of every page and whether it has its own search wording.

09 Website settings

Settings > Site settings holds the contact details used across the whole website: every *Talk to Reece* button, the footer and the contact panel on opportunity pages.

FIGURE 41 Settings > Site settings.

- 1 Contact name.
- 2 Business email.
- 3 WhatsApp number, in full with the country code (for example +44 ...).
- 4 Instagram link.
- 5 WhatsApp opening message: the words a visitor's WhatsApp message starts with.

The admin checks the email address and WhatsApp number before you can publish, so a typing mistake cannot break the contact buttons. Site settings are edited, previewed and published like any page (chapter 03).

Settings > Account shows who you are signed in as, and has **Sign out**. To change your password, click your name at the bottom of the sidebar and choose **Change password**.

Relationships > Users & Admins lists the people who can sign in. Every admin can manage everything.

- **Add admin:** enter their name and email address. They receive an email invitation and choose their own password; nobody else ever sees it.
- **Edit:** change a name or preferred language.
- **Reset password:** sends that person a link to choose a new password.
- **Remove admin access:** they can no longer sign in. You cannot remove your own access, and the last admin can never be removed, so Green Hill can never be locked out.

10 Preview before publishing

Preview shows the **real website page**, built from the same parts as the public site, with your saved draft in place. Previewing never publishes anything.

- 1 Edit your content.
- 2 Wait for **Draft saved** (or click **Save draft**).
- 3 Click **Preview**.
- 4 Check it on **Desktop**.
- 5 Switch to **Mobile** (and Tablet): most visitors arrive on a phone.
- 6 Close the preview (the x or the Esc key) to return to the editor.
- 7 **Publish** when everything reads well.

FIGURE 42 Preview on desktop.

- 1 Desktop.
- 2 Tablet.
- 3 Mobile.

FIGURE 43 The same draft on a phone.

On wide screens the **live preview** beside the page editor shows the page on a phone as you work, and refreshes after each save. On the homepage, phones show the shorter *Headline on phones* when it is filled in, so the live phone preview may differ from the desktop headline. That is intended.

11 Publishing

Every change follows the same calm path:

Draft → **Preview** → **Review** → **Publish**

- **Draft:** the admin saves your work as you go. Only you see it.
- **Preview:** see exactly what visitors will see, on desktop and on a phone.
- **Review:** read it once more. For opportunities, the Review step lists anything missing.
- **Publish:** it goes live straight away.

Only publish when the content has been checked. Visitors, search engines and anyone you have shared a link with see the published version immediately.

If you publish something by mistake: for a page, change it back (**Restore original** puts back the approved wording) and publish again; for an opportunity or note, choose **Unpublish**.

12 Common tasks

Add a new property

- 1 Opportunities > **Add opportunity**.
 - 2 Basics: title, type, summary, Public, price → **Save draft**.
 - 3 Location: region and area.
 - 4 Land & specifications: land size, tenure, zoning.
 - 5 Media: four to six photographs, each with a description.
 - 6 Story: description and *Why Green Hill likes it*.
 - 7 Review → **Preview the memo** → choose *Available* → **Publish opportunity**.
-

Change a property's price

Open the opportunity → Basics → change the price → **Save changes** (if it is live) → check with **Preview**.

Mark a property Reserved

Opportunities → ... on the property → **Mark as reserved** → confirm. (Or Basics → Status → Reserved → **Save changes**.)

Archive a property

... on the property → **Archive opportunity** → **Archive**. It leaves the website at once. To bring it back: Archived → ... → **Restore as draft**.

Replace a property photo

Open the opportunity → Media → **Replace** under the photograph → choose the new file → update its description → **Save changes**.

Feature a property

... on the property → **Feature on the homepage**. To stop: **Remove from featured**.

Publish a Note

Content > Notes (articles) → **New note** → title, summary, text, cover photograph → **Preview** → **Publish**.

Update homepage text

Content > Homepage → find the section → edit the field → wait for *Draft saved* → **Preview** → **Publish**.

Respond to an enquiry

Relationships > Enquiries → open the enquiry → **WhatsApp** or **Email** → move it to **Contacted** → add a short note on what was said.

13 Safe content practices

Before publishing an opportunity, check:

- ✓ Location
- ✓ Land size
- ✓ Tenure
- ✓ Zoning
- ✓ Price
- ✓ Status
- ✓ Photographs, each with a description
- ✓ Description
- ✓ Why Green Hill likes it
- ✓ Search & sharing
- ✓ Preview, on desktop and on a phone

Do not publish information that has not been confirmed. This matters most for **tenure, zoning, ownership, development permissions, price and availability**.

When something is not yet confirmed, leave the field empty (the website shows "Not specified") and keep what you know in **Known facts and what still needs verification**, which is never shown publicly. The Buying in Lombok and Why Lombok pages carry an educational disclaimer; keep it in place.

14 Troubleshooting

"I edited something but don't see it on the website."

It is probably still a draft. Open it and look beneath the title: *Draft · not yet published* means you still need to click **Publish** (or **Save changes** for a live opportunity or note). Then refresh the website page.

"The image upload is still loading."

Large photographs are resized before upload, which can take a few seconds on a slow connection. Keep the page open. If it does not finish, try again with a smaller file (under 5 MB, JPEG, PNG or WebP).

"The preview looks different."

The preview shows your saved draft, so wait for *Draft saved* and reopen the preview. On phones the homepage uses *Headline on phones* when it is filled in. Other languages show their own translation.

"I cannot publish."

Something required is missing. The page shows *Before publishing* with the list, and for opportunities the Review step has an **Add** button next to each missing item. Common reasons: a summary shorter than 20 characters, no primary photograph, an email address or WhatsApp number that is not complete.

"I forgot my password."

On the sign-in page click **Forgot password?**, enter your email address and follow the link in the email. Another admin can also send you a reset link from Users & Admins.

"A property is not appearing publicly."

Check three things: it is published (Available, Reserved or Sold, not Draft or Archived); it is **Public** (Private opportunities are never listed); and, if you expected it on the homepage, that it is **Featured**.

"It says Changed elsewhere."

The same item was saved on another device or by another admin. Reload the page to see the latest version before continuing.
